This book explores the meaning of nation or nationalism in children's literature and how it constructs and represents different national experiences. The contributors discuss various aspects of children's literature and film, including interdisciplinary and multicultural approaches, ranging from the short story and novel to science fiction and fantasy, from a range of locations including Canada, Australia, Taiwan, Norway, America, Italy, Great Britain, Spain, Africa, Japan, South Korea, India, Sweden and Germany. The emergence of mythic nation-states can be seen coinciding with the historical rise of children's literature, while stateless or diasporic nations have frequently formulated their national consciousness and experience through children's literature, both instructing children as future citizens and highlighting ideas of childhood informing the discourses of nation and citizenship. Because nation and childhood are so intimately connected, many scholars and historians have written on the representation of children's literature and national governance. At the same time, given the massive political and demographic changes in the world since the nineteenth century and the formation of nation states, it is also crucial to evaluate how the nation has been challenged by changing national languages through globalization, international commerce, and the rise of English. This book discusses how the idea of childhood pervades the rhetoric of nation and citizenship, and how children and childhood are represented across the globe through literature and film.

To assist the Congress and the administration in deciding the future course of the national water-quality program, we reviewed the findings of recent studies on the quality of water in U.S. rivers and streams and the progress that has been made toward the goals of the Clean Water Act. From our in-depth review and synthesis of the literature and the advice of expert consultants, we formulated four evaluation questions on which the present condition of the nation's water quality changed over time?

What pollutants degrade water quality? 4. What has been the effect of the Construction Grants Program on water quality? In addition to reviewing and synthesizing relevant information from the studies that addressed these questions, we evaluated the methodologies they employed to reach their conclusions.--Page 12.

This wonderful work, "Tears for Jeremiah," is a pastoral and compassionate demonstration of the lamentation of a tender-hearted Saviour over a rebellious people rejecting the Gospel.

Brinsley taught this subject during a national time of solemn humiliation in 1655. His principle text is Luke 19:41-42, (and when he was come near, he beheld the City and wept over it, saying, If thou hadst known, even thou, at least in this thy day, the things which belong unto thy peace! But now they are hid from thine eyes.) His primary point of the treatise was to teach his nation, and the people of the church, to fear the coming judgment of God on the nation for rejecting and despising the Gospel. And then, that God would in his free grace and mercy, turn and look down from heaven and visit this vine, and the vineyard which his own right hand hath planted;.

This practical work highlights the preached word, or the publication of the Gospel. Thus the vineyard which God's grace will exert to preserve, while He leaves the rest to judgment. The vineyard which God will preserve is the nation of Israel. It is made ready to be a fruitful vine which is not to be cut down, but a useful plant which is to be cultivated to the glory of God.

Framing the Nation: Documentary Film in Interwar France argues that, between World Wars I and II, documentary film made a substantial contribution to the rewriting of the French national narrative to include rural France and the colonies. The book mines a significant body of virtually unknown films and manuscripts for its insight into revisions of French national identity in the aftermath of the Great War. From 1918 onwards, government institutions sought to advance social programs they believed were crucial to national regeneration. They turned to documentary film, a new form of mass communication, to do so. Many scholars of French film who gave the French state that made the French state made no significant contribution to documentary film prior to the Vichy period. Using now until overlooked films, Framing the Nation refutes this misconception and shows that the French were early and active believers in the uses of documentary film for social change - and these films reached audiences far beyond the confines of commercial cinema circuits in urban areas.

This book examines Army research psychology - it is a powerful tool in the arsenal of our Soldiers' well-being and, in some cases, very survival. Since our nation began putting Soldiers in harm's way, our forces have experienced the psychological trauma of war. In some cases, the number of casualties due to psychological injury approached the rates of physical injury. As leaders, we spend countless days training our Soldiers to survive the actual battle. Combat training, battle drills, physical fitness, and medical readiness help ensure their physical survival and ultimate victory in the combat zone. Now, we dedicate ourselves to helping ensure their psychological survival and victory when the battle is over. This book grows out of paper presentations and discussions at the Army Research Psychology Biennial Conference held April 24-25, 2008, in Bethesda, Maryland. It provides a snapshot of groundbreaking research currently being done by Army research psychologists around the globe. The book illuminates the many contributions of Army research psychologists to supporting Soldiers and their families, as well as enhancing their performance and well-being. Research breakthroughs and updated treatment methods in the areas of human performance, psychological and environmental stressors, military and family wellness, personality and organizational factors, and leader and cognitive performance are outlined within this volume. The book also serves as a valuable historical document, providing a vivid picture of the 1971 Army research psychology specialty and including a number of personal career stories. It should appeal to a wide range of audiences, including operational commanders, academics, students, and anyone curious about what military research psychology is all about. Today, research psychologists remain true to the fundamental beliefs of Army medicine: to care for our Soldiers, to prepare for their service in the Nation. The War for a Nation provides a brief introduction to the American Civil War from the perspective of military personnel and civilians who participated in the conflict. Susan-Mary Grant brings the experience of those who fought as well as the personal reflections of a female, black and white to the center of a riveting narrative that is accessible to general readers and students of American history.

The War for a Nation explains, in a clear narrative structure, the war's origins, its battles, the expansion of the Union, the struggle for emancipation, and the following saga of Reconstruction. By drawing its examples from primary source documents, first-hand accounts, and scholarly research, The War for a Nation introduces readers to the human-interest aspects as well as the historiographical debates surrounding what was the most destructive war ever fought on American soil.

An analysis of urban education argues that conditions have worsened for inner-city children, looking at how liberal education is being replaced by high-stakes testing procedures, culturally barren and robotic methods of instruction, and harsh discipline.

God gives an amazing word about nations in the Minor Prophets in the Bible that is being worked out before our eyes. This word fits into fulfilling Jesus' Great Commission and also the judgment of spiritual darkness that has come on many nations in the past 80 years. The choice of the U.S. or any other nation for or against joining itself to the Lord Jesus depends crucially on the work or lack of it by the Christians there. We to get what God calls believers to do to save their land. This book focuses on the God-ordained sequence of Joel, Amos, and Jonah, includes the strong conclusion from Malachi, and keeps to the main picture about nations today. This main picture includes what Ephesians, 2Chron. 7:13-14, and Romans 8 show is needed to receive the blessed future of a nation in Jesus instead of a just destruction.

This book, the first feminist ethnography of the violence in Northern Ireland, is an analysis of a political conflict through the lens of gender. The case in point is the working-class Catholic
resistance to British rule in Northern Ireland. During the 1970s women in Catholic/nationalist districts of Belfast organized themselves into street committees and led popular forms of resistance against the policies of the government of Northern Ireland and, after its demise, against those of the British. In the abundant literature on the conflict, however, the political tactics of nationalist women have passed virtually unnoticed. Begoña Aretxaga argues here that these hitherto invisible practices were an integral part of the social dynamic of the conflict and had important implications for the broader organization of nationalist forms of resistance and gender relationships. Combining interpretative anthropology and poststructuralist feminist theory, Aretxaga contributes not only to anthropology and feminist studies but also to research on ethnic and social conflict by showing the gendered constitution of political violence. She goes further than asserting that violence affects men and women differently by arguing that the manners in which violence is gendered are not fixed but constantly shifting, depending on the contingencies of history, social class, and ethnic identity. Thus any attempt at subverting gender inequality is necessarily colored by other dimensions of political experience.
